Dear Mr. Christopher James,

On behalf of the National Institute of Technology, Pragyan 2009, the city of Trichy, and all of India, we want to thank you for your absolutely stunning performance on February 15th, 2009! I personally want to thank you for being a wonderful and accommodating guest and for coming all the way over from Canada! You and your magic are simply amazing. Students, staff, faculty, and pretty much everyone here are still raving about your stage magic show. Most of the 1,500 people who attended your show have said that it made our entire event and that this was our best Pragyan ever!

Everyone greatly appreciated your kindness and professionalism throughout the entire conference. We wanted to thank you for kindly staying for 5 hours after your show to sign autographs and be in photos, for doing all of the interviews with our local and national media, for performing all the time prior to your stage show, including at our VIP dinner, and for being so gracious the entire time.

The University Art Club is still buzzing about how you turned 50 dollars into 500 and they greatly appreciated your donation and generosity. The students are still talking about your impromptu close-up magic performances all over the campus. Finally, everyone here is still stunned about your entire stage magic show; especially the levitation and world-class prediction! We can see why the media here named you the most-happening entertainer in Canada and the US!

We hope that you enjoyed seeing some of India. We know that you loved being blessed by the elephant and seeing our famous Rock Fort temple, one of the major temples in the area! It was great to help you experience our culture, food, and city. We look forward to your return visit for your Cobra Catch stunt and would love to have you come back and perform at Pragyan 2010 next year!

Mr. Arvind Jayashankar
Head, Quality Assurance
